

2009

Tensioners and idlers for commercial vehicles

Spann-/Umlenkrollen für Nutzfahrzeuge

Galets tendeurs et enrouleurs pour poids lourds

Tendicinghia e puleggie per veicoli commerciali

Tensores y poleas para vehículos industriales

Improved design for critical applications

Forged steel pulley:

Stronger pulley, minimises the risk of dislocation of the belt from the pulley

Sealing caps: Prevents contamination of the bearings and extends life of the tensioner

Tandem 6303 bearings: Withstands higher load capacity and ensures longer bearing life

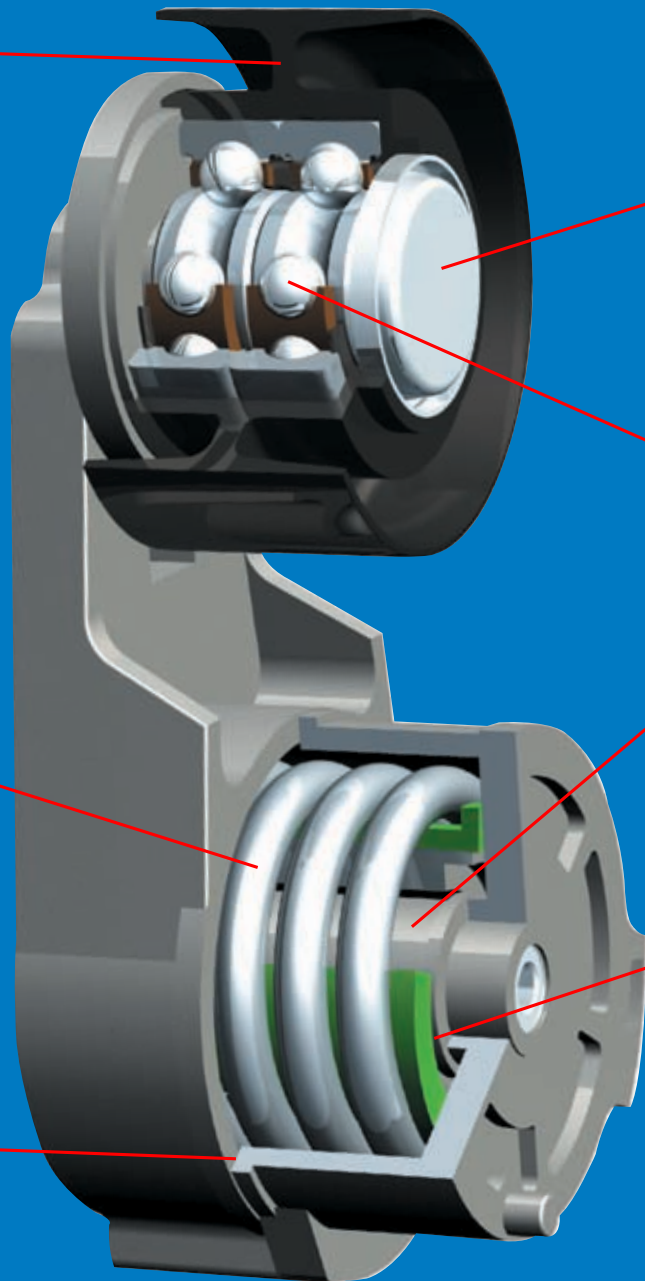

Patented round wire spring:

Better tensioner control and increased service life of the whole system

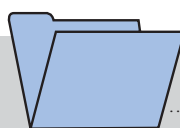

22-25 mm pivot shaft: Largest pivot shaft diameter on the truck market for a stable fit

Patented noose ring technology: Reduces system vibration, leading to smoother operation and extended life of the tensioner

Labyrinth seal: Prevents contamination of the spring and extends life of the tensioner

- Increased life span for the complete auxiliary drive system.
- The improved automatic tensioner lasts up to two times longer than competitors'.
- SKF covers the seven largest truck brands in Europe:
DAF, Iveco, MAN, Mercedes-Benz, Renault, Scania and Volvo.
