SKF – The knowledge engineering company

From the company that invented the self-aligning ball bearing 100 years ago, SKF has evolved into a knowledge engineering company that is able to draw on five platforms to create unique solutions for its customers. These platforms include bearings, bearing units and seals, of course, but extend to other areas including: lubricants and lubrication systems, critical for long bearing life in many applications; mechatronics that combine mechanical and electronics knowledge into systems for more effective linear motion and sensorized solutions; and a full range of services, from design and logistics support to conditioning monitoring and reliability systems.

Though the scope has broadened, SKF continues to maintain the world's leadership in the design, manufacture and marketing of rolling bearings, as well as complementary products such as radial seals. SKF also holds an increasingly important position in the market for linear motion products, high-precision aerospace

bearings, machine tool spindles and plant maintenance services.

The SKF Group has global ISO 14001 environmental certification. Individual divisions have been approved for quality certification in accordance with either ISO 9000 or QS 9000.

With some 100 manufacturing sites worldwide and sales companies in 70 countries, SKF is a truly international corporation. In addition, our distributors and dealers in some 15 000 locations around the world, an e-business marketplace and a global distribution system put SKF close to customers for the supply of both products and services. In essence, SKF solutions are available wherever and whenever customers need them. Overall, the SKF brand and the corporation are stronger than ever. As the knowledge engineering company, we stand ready to serve you with world-class product competencies, intellectual resources, and the vision to help you succeed.

SKF is a registered trademark of the SKF Group.

Sarjan sisältö

Tiettyihin sovelluksiin SKF tarjoaa kahta eri sarjaa:

VKPC sarja sisältää vesipumpun ja asennustarvikkeet.

VKPA sarja sisältää täydellisen vesipumpun, - takakannen ja/tai hihnapyörän - lisäksi tarvittavat asennustarvikkeet.

Jakopään hihnasarjat(VKMC)

Kun vesipumpun käyttöhihna on jakopään hammashihna, **VKMC** sarja sisältää vesipumpun, hihnan ja tarvittavat ohjainrullat
